

## Honda - BF20 SHU

£ 3,199

**Corrosion Protection System**

A patented "Double Sealant" multi-layered sealant process. Sacrificial anodes and stainless steel technology, along with water resistant electronics, will enhance corrosion protection.

**Perfection Mount (PM 4 20)**

An exclusive Honda feature, the PM mount helps absorb the vibration of 4 stroke 2-cylinder outboards, reducing breakdowns and wear that can be caused by the mounting. Accompanied by the existing rubber mounting system, the PM mount also helps protect the use of a Tiller Operator Shaft, helping to reduce wear and tear.

Longitudinal vibration is dispersed internally like a pistonball by optimizing the weight distribution of the crankshaft. To help absorb vibrations, rubber mounts are arranged on the aluminum base that is formed on the engine, resulting in a strong engine. And the outboard without using equipment that is compromising the usability of the tiller handle.

**Customer Benefit:**

- Less vibration on tiller handle
- Light weight - ultimate heavy balance shaft!
